PARTNER FOR LIFE

The “*Technology for healthcare*” company

Enraf-Nonius is market leader in the world of technological solutions for rehabilitation and physiotherapy.

We deliver products and projects of the highest quality according to the most advanced techniques and make these products available world-wide via our comprehensive, international distributor's network. By handling the highest possible level of quality and service, we enable health centres to look after their patients and clients in the most effective and efficient way, and therapists to guarantee their treatments on a daily basis. Enraf-Nonius contributes to a longer, healthier and happier life.

*Quality of life is our corporate
social responsibility*

A legacy of excellence

driven by continuous innovation

Nearly a century of innovation!

Since 1925

With products for X-ray applications and with equipment for diathermy, Enraf-Nonius's roots lie in the field of medical technology. Shortwave devices for physiotherapy have been manufactured since the company's founding in 1925 in Delft, The Netherlands.

Experience gained over many years, craftsmanship, the alliance with universities and our world-wide network of distributors have all contributed to the success story of Enraf-Nonius.

Our range of products comprises equipment for ultrasound, high-, low- and medium frequency therapy, EMG and laser therapy, infra red radiators, as well as treatment tables, traction-, suspension-, exercise- and measurement equipment and thermo therapy units. Enraf-Nonius has designed and manufactured these products and can boast of an extensive installed base in over 100 countries.

Today SONOPULS, ENDOMED, CURAPULS, MYOMED and MANUMED, are considered brand names and are known world-wide.

For products and projects

Products and projects for healthcare

ENRAF-NONIUS

The newest production techniques, the craftsmanship and the continuous interest of the company to optimise the products with the input of users experiences, are confirming the image of the company with the "Passion for Motion" in which the human being is central and a true "Partner for Life".

EN-Projects, a subsidiary of Enraf-Nonius, contributes to the international success and reputation of the company. This specialist in turn-key medical solutions, not only realizes hospital- and rehabilitation projects but also offers procurement and project management. Years of expertise and proven reliability makes EN-Projects an appreciated partner for international government agencies, ministries and health care institutes. EN-Projects has been implementing healthcare facilities all over the world.

Enraf-Nonius and EN-Projects are complementary in their objective to the improvement of healthcare on a global level, now and in the future!

Motivated by a passionate interest in movement, Enraf-Nonius has been developing products for mobility experts and is now the specialist for rehabilitation and physiotherapy products. A world-wide clientele of medical professionals, physiotherapists and movement experts are making use of our quality products on a daily basis. Functionality, reliability and durability are terms which have always been used, then and now, in one breath with Enraf-Nonius products.

Quality is paramount

Quality and reliability

Enraf-Nonius products are designed in accordance with the most stringent requirements for use and safety. Being supplier to institutions and professionals in the medical field, Enraf-Nonius is well aware of its responsibility. Sense of quality is embedded in the Enraf-Nonius organization.

Design, development and manufacturing meet the international standards for medical devices, including the EC Directive 93/42/EEC. The Enraf-Nonius Quality Management System is ISO 13485:2012 and EN ISO 9001:2008 certified.

All our key products have earned the CE marking and comply with the MDD (Medical Devices Directive). They have been registered with, and admitted by, Ministries of Health, in many countries. The name Enraf-Nonius stands for quality and reliability.

Global support

Global support and service

Users of Enraf-Nonius products can be found from Amsterdam to Tokyo and from Northern Canada to Antarctica. These users are supported by an excellent global sales and marketing network. Wherever you are, there always is an Enraf-Nonius partner nearby to help you with up to date product information and with service capabilities. Enraf-Nonius makes a great deal of effort in maintaining a high level of knowledge and invests substantially in knowledge transfer and maintenance of its network of skilled professionals.

In its global marketing Enraf-Nonius can be found at major trade fairs and events like Medica, WCPT and at numerous other congresses and exhibitions. Our products are also intensively used at major sports medical facilities, amongst others the Olympic games, the Royal Dutch Football Association, the World Golf Tournament, and many more facilities. Don't hesitate to contact us in case you want to see our products life in action!

All over the world

ENRAF-NONIUS

Innovative technology for quality of life

Since the foundation of the company in 1925, Enraf-Nonius has had a dedicated in-house Research & Development department. Our engineers in close co-operation with an international group of reputable professionals, design equipment according to the latest developments in the scientific field and with the most advanced technologies available.

The hands-free units for ultrasound therapy are only one example of the unique innovations that originate from this co-operation. The exceptional unit for cervical mobilization with a six degrees of freedom movement ability, the Occiflex, is another example.

Our R&D experts are constantly striving to design products, that not only meet the highest quality requirements and the strictest safety standards, but that are functional, contemporary and user-friendly.

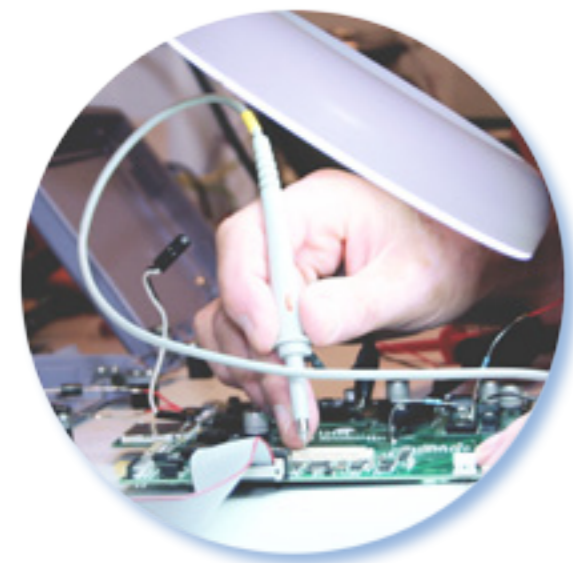

International group of
reputable *professionals*

Logistics is a core activity for Enraf-Nonius. On a daily basis, our staff handles numerous shipments to customers world-wide, with expertise, dedication and care.

Purchasing, quality control of both incoming and outgoing goods, warehousing, repair & technical support and the assembly of customized products are part of the activities.

Our logistic activities are performed from a brand new, ultramodern logistic center in Echt (The Netherlands), situated on the intersection of the Netherlands - Germany and Belgium.
